

Workers and the 25-year contract between China and Iran !

Every economic - political , scientific and commercial , banking , tourism and technology , technical and military , security and cultural that to be concluded anywhere in the world between two companies and Trusts , industrial giants and capital finance firms or two capitalist states , certainly and without a doubt , will be a contract to further the interests of both sides and the interests of the capitalist class of both countries and in order to respond to the urgent needs of the bourgeoisie of the two countries and guarantees the important interests of both governments and at the same time definitely in the direction of bombing livelihoods and the minimum possibilities of life and the most basic human social rights or the lowest social demands of the working masses of both societies . This is one of the most obvious realities of the present world and the history of the wage slavery system . If this or that representative of the bourgeoisie denies these root facts is that the only reason of its deny is their lower share in the distribution of dividened shares , the power and the rule of capital as a whole , is one of the results of this contract . But if workers anywhere in the world would hang their protest and struggle on qualities of these contracts it only has one meaning that is an ignorant , delusional and consciousless workers . All these stigmatizing traits will be true if in the end , stupidly follow behind an opportunistic , deceitful and criminal opposition of the bourgeoisie and repeat their words and thoughts and will be unpaid and rewarding person of seeking more power and share . A catastrophe that occurred on a relatively large scale in recent days and we´re still witnessing it .

The predatory Islamic regime of the Iranian bourgeoisie has signed a protocol with the rabid capitalist state of China called the 25-year comprehensive cooperation program . Clause by clause of this contract , the text of which is published in 18 pages , needs , shortcomings and worries , short and long-term expectations and goals of the dominant sections of the bourgeoisie of the two countries with the utmost care that notes and clarifies . Both regimes are under pressure from the current and future needs of countries´ social capital that agree to recognized the need to conclude this protocol and agreed to pave the path for its implementation . Contrary to some claims , the agreement isn´t the same as the economic agreements between China - Saudi Arabia and China - UAE , it´s a kind of strategic agreement within a capital blockade in the conditions of the current capitalism . When it´s emphasized in the introduction that cultural commonalities , multilateralism , the protection of nation´ right to equal

sovereignty , the model of indigenous development , sharing of similar views on various global issues are the foundation of the work and it also clarifies its distinction with China - USA , European or US satellite economic agreements . The cultural commonalities here aren't about eating habits , social manners and dress code , but it's the view of capital that how the physical and intellectual repression of the labor movement and indigenous development unit model isn't going beyond the form of capital ownership and the state's role , and what capital calls "labor law" !! and "labor rights" or legal , political and civil order would have another meaning . The task of a "single view" of world affairs is quite clear . this isn't a discussion of a few fragmented commercial transactions or discrete investments in the oil and petrochemical , gas and technology industries . It's talking about the relative possible participation as much as possible in the type of planning of the order of sell&purchase labor relation . " 25-year comprehensive cooperation program " for the most part of the chapters , its materials and contents emphasize the importance of providing this event for the both sides . The first paragraph emphasizes its international and regional significance and the second paragraph deals with the ten areas of expandable cooperation and the third paragraph enters another important area and that the current dominant currency of the world is going to be challenged and high-standard banking cooperation will pave the path for crossing the red-lines of the current pole-centered banking centers . Redefine money laundering and terrorism and find its own interpretation and the two countries have responsibility to ensure the security of oil and transportation and refining . Iran's role in the road-belt to regain the necessary prominence and many other points that aren't meant to be explained or even mentioned . The basis of the issue is clear . The two rabid and predatory capitalist state by calculating the shortcomings , problems and bottlenecks and basic needs of the two countries by evaluating their commonalities in the area of challenges , international competitions and rivalries and with aiming to overcome natural contradictions or the inevitable crisis affecting their social capital of production cycle have drawn up and signed a contract . Both are undoubtedly the complete winners of the game and this , too is known to everyone that the trades between the beasts of capital " whoever has more power has more share"! and on this basis , all the controversy of the monarchist , militia and republican oppositions or any other gang of the capitalist class about " selling the Iran " !! , the predatory rulers of the current capitalism are nothing except for the vulgar vociferation . These mafias hang on to such scenarios till up this way :

1. Keep the settlement oven warm with the ruling class rivals ,

2. Let the working masses be such the dry wood for this oven , so far keep masses of workers away from the war against capitalist exploitation and inhumanity and bury the power of class struggle in the stinking swamp of nationalism and make the labor movement the lost consciousness infantry of their power-hungry competitions .

The ultra-reactionary campaign of the clack gangs of the bourgeois over the profits and losses of the so-called Iran - China 25 year cooperation program pursues no other goal and every step of alignment of any worker with these scenarios is a step towards strengthening the power bases of this or that section of the bourgeoisie and further weakening their front of class struggle against capitalism . The beasts of the bourgeoisie frighten us with a shout of the very rudeness and ugliness about selling Iran “homeland” !! “fatherland” !! but Iran is for us , the mass workers , nothing except a burning hell of exploitation and hunger , poverty and misery . The mass workers have no homeland and the word fatherland is very disgusting for workers . Homeland for us , the workers , is a world free from exploitationn , classes and state , a world without any nationality , ethnicity and race , a land full of freedom and prosperity , equality and human needlessness . The Iran - China agreement is a bourgeois traty between the two countries . For this reason and only on this basis , this contract is a criminal , black and catastrophic treaty against us , the working class , and our livelihood , work and class struggle and lives . This contract , increases the power of capital and strengthens the position of the capitalist class , and it empowers the capitalist state to be more sustainable and allows capitalist beasts to double our exploitation pressure and follow it suppress our anti-wage slavery movement more severely . Make us even hungrier , more displaced and miserable and poorer , deepen and expand the deprivation of the working masses for medication , tratment and the minimum necessities of life and make our living environment tens of times more polluted and pathogenic . Are all these ominous events waiting for us because of the agreement in question between Iran and China !!! this is the dirtiest interpretation that can be leveled at the content of the topic . The matter has nothing to do with China , United States , Russia and Europe or Japan or any other part of the contract . The debate is essentially not about treaties but only about capital . The essence of the word is that every motion of capital in general and in the historical conditions of the day is more than ever aggressive against the head of our livelihood and the basis of our existence . Any protocol between two capitalist states in every field , apart from what has been said , there will be no other side effects for us . A worker who doesn't accept this is not only delusional and consciousness but has made a covenant with self that not to learn anything from self-life . Some may promise themselves that Chinese capital will

bring employment and they may think that Chinese capitalists are paying wages at the end of each month and in time . All of this is ridiculous and derisive fantasies . China's unemployed population isn't even relatively less than other countries, compared to other parts of the world and workers' wages in China also come with long delays too . What can reach our cry isn't the dignity of capital and capitalists , not even the treaties and protocols of capitalist states or capital owners , but that is just one thing and that is that council organizing global and anti-wagelabor power of class struggle against capital . This is the only lifeboat , that is all .
