

\*Israeli holocaust in Gaza, democracy camp, Iranian workers\*

2.3 million Palestinian, including women, children, old and young people, as prisoners, have no connection with the world ahead. All the ways to send them food and all other necessities to live and survive are being closed by Israelis. Water and electricity is cut off, all the channels of life are blocked, the only thing that has the right to enter to this dungeon without restraint is to bombs that fall on millions of people from bombers equipped with the latest achievements of science, industry, technique, thought, and politics of world capital. So far, the dismembered bodies of more than 497 to 600 infants and young children have been found in the debris caused by the aerial bombardments of the Israeli government.

The fascist leaders of Israel, with the unconditional support of the American and the European governments and also with support of the European Union, have announced that they will continue the bombings until they complete destruction of Gaza. More than 80% of the residents of the Gaza Strip, which is 365 square kilometers, have to leave their homes. The number of Palestinian deaths has exceeded several thousand and is increasing every minute.

Global capitalism and the fascist leaders of Israel have been bombing the Palestinian people for 75 years.

\*What is Hamas, and what is its purpose and background? \*

Hamas is being built by America, CIA, Mossad, Israeli government, and Shabak.

On the other hand, the Islamic regime of Iran is also an outcome of the American government strategy as the same as al-Qaeda and Taliban. The United States was competing with the Soviet Union for the emergence of the Afghan Mujahideen, but the Taliban did not become America's ideal model. Hamas was also born from such a process, and at the same time, it was the contradictory offspring of capitalism, the Israeli regime, and the western pole of global capital. The main point is that the so-called al-Aqsa storm has no point for the Palestinian people and 4 million Palestinian workers. Secondly, despite its reactionary identity, Hamas has not beheaded children and women. What is reflected in the tribunes of the American and European governments is not true. This fake news is the basis to ignite the flames of the holocaust, which is now over two million Palestinian workers. The fact that what Biden, Netanyahu, and the Western media have done is a lie since the beginning of starting recent war until now, even the publishers of these lies have now admitted this fake news. Despite all this, the predatory government of Israel, the United States, and the Western capitalist bloc are determined to burn the two million Palestinian workers, two million of the world's working class, to ashes in the fire of their bloodbath and genocide. The governments of Germany, France, Denmark, the Netherlands, Belgium, and the European Union have warned all the citizens of these countries that it is completely prohibited to support Palestinians. the truth is, what is happening is not only the holocaust of capitalism and the fascist leaders of Israel against the residents of Gaza. It is the holocaust of capitalism against humanity.

The disaster is not limited to this; There have been many times that in this hell of capitalism in Iran, our comrades in their protests, strikes and struggles against poverty and misery and low wages instead of expressing their anger and rage against capital, against the capitalist class, against the barbarity and crime of the Islamic regime as a predatory capitalist government, they have chanted "No to Gaza, no to

Lebanon, sacrifice our life for Iran"!! It is the accurate translation of this slogan, which says that the Islamic regime of Iran is the guardian of the rights, welfare, freedom, and human life of the Palestinian!!

Another point is that Iranian reactionary and ultra-right oppositions have turned to support Israel, and this is what exactly expected from them.

**\*Workers and oppressed people of Iran\***

Let us shout that Palestinian and workers of all countries have the same destiny, and we all must stand against the governments. They are enemies, they are armed and murderous against all of us. At the same time we condemn any kind of participation in fake and deceptive demonstrations of the Islamic regime under the false banner of supporting Palestine and start trying to organise independent protests of our class in support of the Palestinian workers and against the bloodbath of the predatory Israeli.

There is an important question facing each and every Iranian worker:

Is poverty, hunger, displacement, low wages, a deadly environment, a lack of medicine, and other problems because the Islamic regime has been spent for Palestinian?!

you do not need to be so intelligent to answer this question. The answer simply is a big NO. The Islamic regime has spent all our money, which is the result of our work and suffering, for its warmongering policies in the region, not for the Palestinian people. The reality is that the lives of the oppressed people of Palestine were not and are not important at all for the Islamic regime.

Our contrary to this racist idea, the whole result of our work, production, direct exploitation of the capital of the capitalist class and becomes a tool for seeking power, extravagance, seeking development and creating crisis of the Islamic regime in the region and the world.

It is a wrong way to stand against the Palestinian workers and the oppressed, instead of fighting capital and the machine of capitalist rule.

Therefore, we call all workers of Iran to rise up and support the workers in Palestine instead of supporting the capitalists and their racist governments. We call all people, workers, and comrades in Iran to stand by the workers and people of Palestine in these very sensitive historical conditions. At the same time, with all the forces, let's rise up to expose the crisis-creating and warmongering of the Islamic regime of Iran and show that the Islamic regime's support for Palestine is a pure and hypocritical lie.

The Islamic regime of Iran, this wild monster of capital rule, is the enemy of the Palestinian workers as much as it is our class enemy. Let us shout that we, the workers of Israel and the working masses of Palestine are united battalions of the world working class, the Islamic Republic, the government of Israel, the government of America and all the governments of the world are enemies armed to the teeth and murderous against all of us. We condemn any kind of participation in fake and deceptive demonstrations of the Islamic Republic under the false banner of supporting Palestine and start trying to organise independent protests of our class in support of the Palestinian workers and against the bloodbath of the predatory Israeli government.

Anti-capitalist workers
